- Banknotes processing module with removable cash box, capacity of up to 1200 banknotes.
- Bar code reader to identify payment utility bills.
- Biometric card reader for the highest level of security without pin code entering.
- Elegant and modern Italian design for a kiosk equipped with touch screen monitor, thermal receipt printer and hybrid card reader.
- DDA compliant.

Designed and Manufactured in Italy

The FPS 3000 is a self service bill payment kiosk designed to **accept bill payments via cheques, cash or credit card**. With the combination of 3 payment methods, the FPS 3000 offers customers the exceptional flexibility in making payments, as well as ensures improved customer experience in terms of speed, security and reliability.

Customers will be able to pay their bills at their convenience and a receipt can be printed out as proof of successful payment at the end of each transaction. The FPS 3000 serves as an excellent method for accepting bill payments because it offers a cost effective alternative for payment collection, without compromising customer service, efficiency, privacy or convenience.

Designed and built with the consideration of physically disabled persons, the FPS 3000 is fully **DDA compliant**. Slim and ergonomically designed, it is ideal for 24-hour lobby installations.
